EDUCATION

Bachelor of Engineering, Software Engineering (Co-op)

Concordia University, Montreal, QC

Expected Graduation: May 2029

GPA: 4.2/4.3

PROJECTS

Guardian Angel | McGill AeroHacks 2026 | AeroPitch Winner

March 2026

- Built a **Flutter** mobile app enabling **real-time AI-driven navigation for visually impaired users**, with multi-device coordination and a **Python** backend
- Integrated **ElevenLabs API** text-to-speech for real-time voice guidance and optimized **Gemini API** latency by compressing image payloads before submission

AtHackCTF | Cybersecurity Competition | 2nd Place, Interac Beginner Challenge

March 2026

- Scored **60%** of the team's total points across PWN, hardware, and web exploitation challenges
- Decoded **ELF** binaries on **Linux**, performed binary exploitations using **pwntools** for memory manipulation and shellcode injection, and conducted hardware forensics on **RFID** cards to extract hidden data

Bartr | APP|ETS Mobile Hackathon | 1st Place & Best UI Design (\$1,750)

Dec 2025

- Implemented UI components and core features for a Tinder-style cross-platform mobile app **in 24 hours** using **Flutter (Dart)**, with Provider state management and Stream-driven real-time data sync
- Reduced database reads by 80% with profile caching (5-min TTL) in **Firebase (Cloud Firestore)**, and implemented app localization with geolocation-based user distance tracking using device latitude/longitude

The Neon Cat | McGill 10th Physics Hackathon

Feb 2026

- Built a **JavaScript** 2D game engine from scratch with a custom physics engine, decoupled subsystems, and a frame-rate-independent game loop
- Designed an ASCII map DSL and plugin-based architecture for flexible map generation with **Node.js** scripts

Bolete-Hell | Personal Team Project

May 2025 – October 2025

- Developed core gameplay systems such as enemy AI, projectile patterns, collision handling, and health logic in a **5-person Unity (C#)** team, refining on game balance through playtesting

LiveJam | McGill CodeJam 2024 Hackathon

Nov 2024

- Contributed to the development of a full-stack cross-platform application **in 48 hours** using **Flutter**, with a **NestJS** backend, **PocketBase** for real-time storage/authentication, and a Next.js admin dashboard

EXPERIENCE

Independent Math Tutor

Montreal, QC

Tutor & Developer

October 2025 – Present

- Developed a full-stack tutoring web platform with a **custom backend** to track and visualize student performance
- Tutored students 1-on-1 in mathematics, identifying knowledge gaps and adapting learning strategies to student needs

Founder & Community Manager

Montreal, QC (Remote)

Online Gaming Content Brand

2020 – 2022

- Created, grew and managed a gaming content brand to **100k+ followers** on Instagram, operating the platform as a paid advertising channel and coordinating sponsored promotions for external businesses
- Created and moderated an associated **2k-member Discord community**, managing moderation workflows, announcements, and community engagement

TECHNICAL SKILLS

Programming: C#, Java, Dart, Python, JavaScript (ES6+), Bash, CSS3, HTML5, SQL

Frameworks: Flutter, Unity, NestJS, Next.js, Spring Boot, Provider

Technologies: SQLite, Firebase, PocketBase, Docker, Cloudflare, Render, MongoDB, OpenCV, Node.js, pwntools, ElevenLabs API, Google Gemini API

Developer Tools: Git, GitHub, Linux, REST API, CI/CD

Concepts: Real-time systems, Reverse engineering, Geolocation services, Game development
